

# Horizon Cardiology Web

HORIZON CLINICALS

Imagine reviewing cardiac procedures and signing reports from any location, at any time of day. That is the power of Horizon Cardiology™ Web, a Web application for high-quality image review and reporting on any standard computer with an Internet browser.

With Horizon Cardiology Web, report turnaround time is no longer dependent on whether or not the physician is actually on the hospital premises. Physicians review cardiac procedures stored in the Horizon Cardiology database and sign reports from anywhere: office, clinic or home. The result – maximum convenience and speed.

Horizon Cardiology Web incorporates the intuitive interface functionality, processing and reporting tools that, until now, were found only on Horizon Cardiology diagnostic workstations. Image quality is superb and, with just one click, Horizon Cardiology Web displays a high quality DICOM image of any frame.

With Horizon Cardiology Web, your cardiovascular database has no limits and now, neither do you.

## BENEFITS

- *Access cardiology procedures and reports from any location, at any time*
- *Display diagnostic-quality DICOM image frames*
- *Electronically sign and finalise reports*
- *Integrate easily with physician portals and PACS*

## FEATURES

- *Secure access technologies including SSL*
- *Advanced image enhancement and measurement tools*
- *Report review and creation over the Web*
- *Automatic submission of results and billing data to the HIS*

## ABOUT HORIZON CARDIOLOGY

Horizon Cardiology is a complete cardiovascular information solution for Cath, Haemodynamic Monitoring, Echo, Vascular Ultrasound and Nuclear Cardiology. It meets the full spectrum of needs for healthcare organisations with diagnostic digital image management, archiving, procedure reporting and workflow management. Horizon Cardiology moves organisations one step closer to an enterprise image and information management solution by integrating reports, images, waveforms and measurements into the patient's complete record, accessible over local networks or remotely over the Web. The result is unmatched productivity and greater throughput in the cardiology department, along with better, safer decisions for patient care.

# THE HORIZON CARDIOLOGY WEB WORKFLOW

## 1. Securely log-in to cardiac database

- Instantly access all images and reports from any computer equipped with a standard Internet browser
- Integrate simply with physician portal and PACS systems
- Access securely to ensure HIPAA compliance

## 2. Access the patient's cardiac medical record

- Review and compare images from different DICOM 3.0 modalities, including cath and echo
- Compare previous patient studies from all modalities side-by-side

## 3. Professionally review

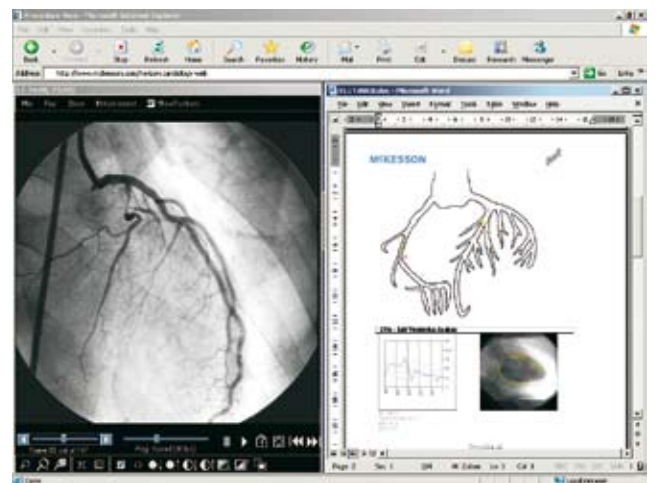

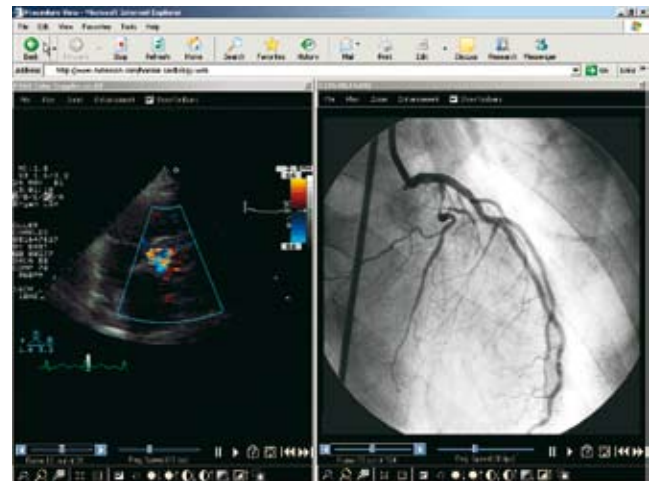

- Use advanced image enhancement and measurement tools
- Display diagnostic-quality DICOM image frames

## 4. Generate clinical reports from any location

- Complete procedure reports easily using familiar reporting tools
- Eliminate double data entry and save time using auto population from haemodynamic and echo machines

## 5. Sign and submit reports

- Electronically sign and finalise reports
- Automatically submit results and billing data to the HIS, reducing report turnaround time
